

2023/2024 Product Guide

CUTTING EDGE POLY

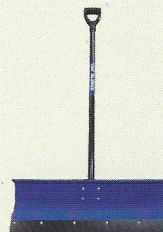

Innovations in Plastics

OUR PRODUCTS

Poly Edger Blades: Mandated in National Cemeteries and used by professional landscapers, along with homeowners, to edge pavers, aluminum edging, aggregate walkways, driveways and sidewalks. Our blades are quieter, non-marring, and won't chip and scratch your landscaping like steel blades.

The Slider Snow Shovel: If you are tired of your shovel breaking, scratching your surface or just falling apart, you haven't tried the Slider. Our shovels come in 4 sizes: 23, 29, 35, & 41 inch widths. Every Slider comes with a replaceable poly cutting edge and is built to last. Give these a try and you won't regret it.

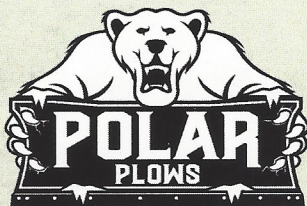

ATV/UTV POLY EDGES: Our ATV line of poly cutting edges are the best cutting edges on the market. These edges completely out perform steel and rubber. They are quiet in operation and float over the grass rather than digging in, while still scraping wonderfully on your hard surfaces. Every ATV or sidewalk plow should have these edges!

Truck and Pusher Box Poly Edges:

Cutting Edge Poly offers a wide selection of poly cutting edges for all of your trucks and heavy equipment. These edges out perform all other edges, are quiet in operation and non-marring to your surfaces. Our edges are not the poly of yesterday. You will love how these perform. Our customers even report saving gas when replacing their factory edges!

Snow Blower Poly Edges/

Shoes: Cutting Edge Poly offers a universal poly cutting edge for your snow blower. Simply replace your factory edge for increased performance, less noise, and no scraping or gouging. Pair your new edge with our poly blower shoes for the perfect snow blower upgrades.

Poly Bucket Edges: All buckets should come with our poly edges. If you are tired of your metal edge scratching, breaking, and just causing damage, you need to try our poly bucket edges. We offer poly bucket edges in bolt-on and clamp-on systems. Let us or our dealers know your sizes and we will get you set with a blank or predrilled edges right away. Once you use these, you will wonder why you ever used a steel edge!

Polar Snow Plows: Welcome to the best built skid steer and tractor snow plows on the market. Polar Plows are 100% built in the United States. Each plow can be ordered in 4', 6' and 8' sizes with or without wings. Hookup options are mini skid steer with oscillation, ASV 30 quick attach, full size skid steer style quick attach and clamp-on versions for tractors or machines that want to keep the buckets on. All plows are offered with our industrial strength poly cutting edges.

ABOUT US

Cutting Edge Poly has specialized in wearable edges since 2008. We have increased our product line to include wearable edges for most equipment and have recently added on Polar Snow Plows. We will continue to bring new and exciting products to the landscaping and snow removal industry.

Trailer Wear Pucks:

Cutting Edge Poly makes a 2.5x2.5 inch poly wear puck for enclosed trailers. These pucks also work well under pots to avoid scratching your decks and patios

Bolt Kits: Don't forget your nuts and bolts. We offer the highest grade bolts kits for all of your needs.

This is an excellent product if you want to protect your cobble or cement, does not scratch and I think actually cleans better and is a protection for your snow blower.
Shane L.

Customer service is outstanding.
Cutting Edge Bar fit like a glove.
Ronald M

Was exactly what I wanted.
Drilled and installed in 10 minutes.
Ready for snow.
Thank You
Duane B

The edge performs better than expected when it comes to scraping packed snow. Was easy to drill holes for mounting and am pleased so far.
Shipping was very fast.
Would highly recommend.
Thomas

See What Our Customers Are Saying

We really enjoyed the Polar Plow on the small Cat skid loader for walks. It cut time for us and it really maneuvered well around poles. It was more of a solid plow for us!
Troy Clogg Landscape Associates

We use this on our Boss Snowrator fleet for our commercial snow removal. These poly edges work perfect and last a lot longer then stock cutting edges. Would highly recommend.
John

High quality, holds up well and very fast shipping!
Thomas

Having about 200+ plus feet of concrete driveway I wish I bought this years ago! You can hear how soft your loader is when using and does not "hit" or scrap the driveway hard. When you have the loader in the float position and hit something not flat, no "bang" on the loader. Plus if keeps your metal FEL being ground down to a knife edge. So far the blade is holding up well. I also do about 125 feet of concrete side walk too.
Mike B.

Call us today! We would love helping you find the perfect product for your outdoor maintenance needs.
